Safety Data Sheet

According to Annex II to REACH - Regulation (EU) 2020/878

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Code: **REF 6028**
Product name **NP99 ILARY**

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use **Cosmetic**

1.3. Details of the supplier of the safety data sheet

Name **PASSIONE BEAUTY S.P.A.**
Full address **Viale Crispi 89-93**
District and Country **36100 Vicenza (VI)**
Italia
Tel. +39 0444-239569
e-mail address of the competent person responsible for the Safety Data Sheet **quality@pucosmetica.it**

1.4. Emergency telephone number

For urgent inquiries refer to **+39 0444-239569**

SECTION 2. Hazards identification

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878.
Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

Flammable liquid, category 2	H225	Highly flammable liquid and vapour.
Eye irritation, category 2	H319	Causes serious eye irritation.
Specific target organ toxicity - single exposure, category 3	H336	May cause drowsiness or dizziness.

2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal word: Danger

Hazard statements:

H225	Highly flammable liquid and vapour.
H319	Causes serious eye irritation.
H336	May cause drowsiness or dizziness.
EUH066	Repeated exposure may cause skin dryness or cracking.

Precautionary statements:

P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

SECTION 2. Hazards identification ... / >>

P280	Wear protective gloves/ protective clothing / eye protection / face protection.
P370+P378	In case of fire: use . . . to extinguish.
P261	Avoid breathing dust / fume / gas / mist / vapours / spray.
P233	Keep container tightly closed.
P312	Call a POISON CENTRE / doctor / . . . if you feel unwell.

Contains: n-butyl acetate
Ethyl acetate
Propan-2-ol

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration ≥ 0.1%.

SECTION 3. Composition/information on ingredients

3.2. Mixtures

Contains:

The full wording of hazard (H) phrases is given in section 16 of the sheet.

SECTION 4. First aid measures

4.1. Description of first aid measures

General first aid measures: If you feel unwell, consult a doctor.
In case of inhalation: Remove the casualty to fresh air and keep him at rest in a position comfortable for breathing.
In case of skin contact: Wash skin with plenty of water.
In case of contact with eyes: Wash eyes with water as a precaution.
If ingested: If you feel unwell, contact a poison control center or doctor.

Rescuer protection

Information not available

4.2. Most important symptoms and effects, both acute and delayed

SECTION 4. First aid measures ... / >>

Symptoms/effects after inhalation: None under normal conditions.
Symptoms/effects after skin contact: None under normal conditions.
Symptoms/effects after eye contact: None under normal conditions.
Symptoms/effects after ingestion: None under normal conditions.

4.3. Indication of any immediate medical attention and special treatment needed

Treat the symptoms.

Means to have available in the workplace for specific and immediate treatment

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media: water jet, dry powder, foam, carbon dioxide.
Unsuitable extinguishing media: do not use a powerful jet of water.

5.2. Special hazards arising from the substance or mixture

Fire Risk: No fire risk.
Explosion risk: No risk of direct explosion.
Hazardous decomposition products in case of fire: Possible release of toxic fumes.

5.3. Advice for firefighters

Firefighting instructions: Fight the fire from a safe distance and from a protected place. Do not enter the fire area without adequate protective equipment, including respiratory protection.
Protection during firefighting operations: Do not attempt to intervene without adequate protective equipment. Self-contained breathing apparatus. Full protective clothing.

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

General measures: Stop the leak if it is safe to do so. Notify the authorities if the product enters sewers or public waters.
Absorb spill to prevent property damage.
For non-emergency personnel
Protective Equipment: Wear recommended personal protective equipment.
Emergency Procedures: Ventilate spill area.
For rescuers
Protective equipment: Do not attempt to intervene without adequate personal protective equipment. For further information, see section 8: "Exposure controls/personal protection".

6.2. Environmental precautions

Avoid release into the environment

6.3. Methods and material for containment and cleaning up

For containment: absorb spilled material with sand or earth. Contain any spills with dikes or absorbent materials
prevent migration and entry into sewers or waterways. If possible, stop the leak safely.
Clean-up methods: Absorb spilled liquid with absorbent material.
Other information: Dispose of solid materials or waste at an authorized site.

6.4. Reference to other sections

For more information, see section 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Additional Hazards During Processing: Not expected to present significant hazards under normal conditions of use.
Precautions for safe handling: Make sure to ensure good ventilation of the workstation. Wear personal protective equipment.
Hygiene measures: Do not eat, drink or smoke when using this product. Always wash your hands after handling the product.

SECTION 7. Handling and storage ... / >>

7.2. Conditions for safe storage, including any incompatibilities

Technical measures: Store in a cool, well-ventilated place, away from heat sources.
Storage conditions: Store in a cool place. Protect from sunlight.
Packaging materials: Always store the product in a container made of the same material as the original packaging.
Switzerland: Storage class (LK): LK 3 - Flammable liquids

7.3. Specific end use(s)

No further information available

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.
When choosing personal protective equipment, ask your chemical substance supplier for advice.
Personal protective equipment must be CE marked, showing that it complies with applicable standards.
Provide an emergency shower with face and eye wash station.
HAND PROTECTION
Protect hands with category III work gloves.
The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, permeability time.
The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.
SKIN PROTECTION
Wear category I professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.
Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.
EYE PROTECTION
Wear airtight protective goggles (see standard EN ISO 16321).
RESPIRATORY PROTECTION
Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type AX filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387).
If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing

SECTION 8. Exposure controls/personal protection ... / >>

apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.
ENVIRONMENTAL EXPOSURE CONTROLS
The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

SECTION 10. Stability and reactivity

10.1. Reactivity

The product is not reactive in normal conditions of use, storage and transport.

10.2. Chemical stability

Stable in normal conditions.

10.3. Possibility of hazardous reactions

There are no known dangerous reactions in normal conditions of use.

10.4. Conditions to avoid

None in the recommended storage and manipulation conditions (see section 7).

SECTION 10. Stability and reactivity ... / >>

10.5. Incompatible materials

No additional information available

10.6. Hazardous decomposition products

In normal storage and use conditions, it should not produce dangerous decomposition products.

SECTION 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification.
It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

SECTION 13. Disposal considerations ... / >>

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.
Waste transportation may be subject to ADR restrictions.
The management of waste arising from the use or dispersal of this product must be organised in accordance with occupational safety regulations. See section 8 for possible need for PPE.
CONTAMINATED PACKAGING
Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

CALCULATION METHODS FOR CLASSIFICATION
Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.
Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

SECTION 16. Other information ... / >>

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
