SECTION 7. Handling and storage			
7.1. Precautions for safe handling			
Handling requirements: Avoid direct contact with the substance. Avoid the formation or diffusion of dust in the air.			
7.2. Conditions for safe storage, including any incompatibilities			
Storage conditions: Store in a cool, well-ventilated area. Keep container tightly closed.			
7.3. Specific end use(s)			
Specific end uses: No data available.			
SECTION 8. Exposure controls/personal protection			
8.1. Control parameters			
Information not available			
8.2. Exposure controls			
As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.			
When choosing personal protective equipment, ask your chemical substance supplier for advice.			
Personal protective equipment must be CE marked, showing that it complies with applicable standards.			
Provide an emergency shower with face and eye wash station.			
HAND PROTECTION			
Protect hands with category III work gloves.			
The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, failure time and permeability.			
The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.			
SKIN PROTECTION			
Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.			
EYE PROTECTION			
Wear airtight protective goggles (see standard EN ISO 16321).			
RESPIRATORY PROTECTION			
Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type A filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387).			
If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.			
ENVIRONMENTAL EXPOSURE CONTROLS			
The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.			
Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.
