Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023 Page n. 1/9

# Safety Data Sheet

According to Annex II to REACH - Regulation (EU) 2020/878 and to Annex II to UK REACH

### SECTION 1. Identification of the substance/mixture and of the company/undertaking

### 1.1. Product identifier

 Code:
 REF 4050

 Product name
 Refill Soft Natural

 1.2. Relevant identified uses of the substance or mixture and uses advised against

 Intended use
 Curable UV resin/gel, for professional use only

 1.3. Details of the supplier of the safety data sheet

# Nema

PASSIONE BEAUTY S.P.A. Viale Crispi 89-93		
36100	Vicenza Italia	(VI)
Tel.	+39 0444-239569	
quality@p	oucosmetica.it	
	Viale Cris 36100 Tel.	Viale Crispi 89-93 36100 Vicenza Italia

For urgent inquiries refer to

+39 0444-239569

# **SECTION 2. Hazards identification**

### 2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878.

Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:		
Eye irritation, category 2	H319	Causes serious eye irritation.
Skin irritation, category 2	H315	Causes skin irritation.
Skin sensitization, category 1	H317	May cause an allergic skin reaction.
Hazardous to the aquatic environment, chronic	H412	Harmful to aquatic life with long lasting effects.
toxicity, category 3		

### 2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words:

Warning

Hazard statements:

H319 H315 H317 H412

Causes serious eye irritation. Causes skin irritation. May cause an allergic skin reaction. Harmful to aquatic life with long lasting effects.

Precautionary statements:

### SECTION 2. Hazards identification ... / >>

P280	Wear protective gloves / eye protection / face protection.
P261	Avoid breathing dust / fume / gas / mist / vapours / spray.
P333+P313	If skin irritation or rash occurs: Get medical advice / attention.
P337+P313	If eye irritation persists: Get medical advice / attention.
P264	Wash thoroughly after handling.
P362+P364	Take off contaminated clothing and wash it before reuse.

Contains:

Aliphatic urethane acrylate

# 2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration  $\ge 0.1\%$ .

# **SECTION 3. Composition/information on ingredients**

### 3.2. Mixtures

Contains:				
Identification		x = Conc. %	Classification (EC) 1272/2008 (CLP)	
Aliphatic urethane acrylate				
INDEX		40 ≤ x < 42,5	Eye Irrit. 2 H319, Skin Irrit. 2 H315, Skin Sens. 1 H317, Aquatic Chronic 3 H412	
EC				
CAS				
ALIPHATIC URETHANE DIACRYLATE				
INDEX		$40 \le x \le 42,5$	Eye Irrit. 2 H319, Skin Irrit. 2 H315	
EC				
CAS				
POLYETHYLENE GLYCOL 200 DIMETHACRYLATE				
INDEX		15 ≤ x < 16,5	Eye Irrit. 2 H319, Skin Irrit. 2 H315, STOT SE 3 H335	
EC				
CAS	25852-47-5			
TPO-L				
INDEX		4 ≤ x < 4,5	Aquatic Chronic 3 H412	
EC	282-810-6			
CAS	84434-11-7			

The full wording of hazard (H) phrases is given in section 16 of the sheet.

# **SECTION 4. First aid measures**

### 4.1. Description of first aid measures

Skin contact: Immediately remove contaminated clothing and footwear unless they are stuck to the skin. Wash immediately with soap and water.

Contact with eyes: Flush the eye thoroughly with running water for 15 minutes. Consult your doctor.

Ingestion: Rinse mouth with water. Consult your doctor.

Inhalation: Remove the casualty from exposure ensuring your safety in the operation.

Consult your doctor.

### 4.2. Most important symptoms and effects, both acute and delayed

Skin Contact: Irritation and redness may occur at the site of contact. Eye contact: Irritation and redness may occur. The eyes may water profusely Ingestion: Redness and pain in the mouth and throat may occur. Inhalation: Throat irritation with a feeling of tightness in the chest may occur. Exposure may cause coughing or shortness of breath. Delayed/Immediate Effects: Short-term exposure causes immediate effects.

### 4.3. Indication of any immediate medical attention and special treatment needed

ΕN

Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023

Page n. 2/9

Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023 Page n. 3 / 9

Immediate/Special Treatment: An eyewash fountain shall be available within the building.

### **SECTION 5. Firefighting measures**

### 5.1. Extinguishing media

Extinguishing media: It is necessary to use an extinguishing agent suitable for the fire area. Use water spray to cool containers.

### 5.2. Special hazards arising from the substance or mixture

Risks of exposure: When burned, toxic fumes are emitted.

### 5.3. Advice for firefighters

Special protective actions for firefighters: Promptly isolate the area by removing all people from the area of the accident in case of fire. No action shall be taken involving personal risk or without adequate training.

Special protective equipment for firefighters: Firefighters must wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a face shield operating in positive pressure mode. Firefighter clothing (including helmets, protective boots and gloves) conforming to the European standard EN 469 will provide a basic level of protection for chemical incidents.

### **SECTION 6.** Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

If outside, do not approach from downwind. If outdoors, keep passers-by upwind and away from the danger point. Delimit the contaminated area with signs and prevent access to unauthorized personnel. Turn the leaking container so that it does not drip to prevent liquid from spilling.

### 6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

Limit spillage by using protective wrap.

#### 6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

Cleaning Procedures: Absorb in dry earth or sand. Transfer to a labeled airtight recovery container and discard appropriately.

### 6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

# **SECTION 7. Handling and storage**

### 7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

Avoid direct contact with the substance. Make sure there is sufficient ventilation in the environment. Do not handle in a closed environment. Avoid the formation or diffusion of mist in the air.

### 7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023 Page n. 4 / 9 ΕN

### SECTION 7. Handling and storage ... / >>

### 7.3. Specific end use(s)

Information not available

# **SECTION 8. Exposure controls/personal protection**

### 8.1. Control parameters

Information not available

### 8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

HAND PROTECTION

Protect hands with category III work gloves.

The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

EYE PROTECTION

Wear airtight protective goggles (see standard EN ISO 16321).

RESPIRATORY PROTECTION

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. Use a mask with a type B filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387).

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529. ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

# **SECTION 9.** Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

Properties Appearance Colour Odour Melting point / freezing point Initial boiling point Flammability Lower explosive limit Upper explosive limit Flash point Auto-ignition temperature Decomposition temperature pH	Value liquid pink characteristic not available not available not available not available s 60 °C not available not available not available not available	Information
Kinematic viscosity Solubility	not available not available	
Partition coefficient: n-octanol/water Vapour pressure	not available not available	
Density and/or relative density Relative vapour density	not available not available	
Particle characteristics Viscosity: viscous	not applicable	
viscosity. viscous		

### SECTION 9. Physical and chemical properties ... / >>

### 9.2. Other information

9.2.1. Information with regard to physical hazard classes

Information not available

9.2.2. Other safety characteristics

Information not available

### SECTION 10. Stability and reactivity

#### 10.1. Reactivity

Stable under recommended transportation or storage conditions

### 10.2. Chemical stability

Stable under normal conditions.

### 10.3. Possibility of hazardous reactions

Under normal conditions of transport or storage, no dangerous reactions occur. Decomposition may occur if exposed to the conditions or materials listed below.

### 10.4. Conditions to avoid

Heat

### 10.5. Incompatible materials

Strong oxidizing agents. Strong acids

#### 10.6. Hazardous decomposition products

When burned, it emits toxic fumes.

# **SECTION 11. Toxicological information**

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Information not available

Interactive effects

Information not available

ACUTE TOXICITY

ATE (Inhalation) of the mixture: ATE (Oral) of the mixture: ATE (Dermal) of the mixture: Not classified (no significant component) Not classified (no significant component) Not classified (no significant component) Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023 Page n. 5 / 9

### SECTION 11. Toxicological information ... / >>

### SKIN CORROSION / IRRITATION

Causes skin irritation

### SERIOUS EYE DAMAGE / IRRITATION

Causes serious eye irritation

**RESPIRATORY OR SKIN SENSITISATION** 

Sensitising for the skin

### GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

### CARCINOGENICITY

Does not meet the classification criteria for this hazard class

### REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

### **STOT - SINGLE EXPOSURE**

Does not meet the classification criteria for this hazard class

### STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

### ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

### 11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

### **SECTION 12. Ecological information**

This product is dangerous for the environment and the aquatic organisms. In the long term, it have negative effects on aquatic environment.

### 12.1. Toxicity

Information not available

#### 12.2. Persistence and degradability

Biodegradable.

#### 12.3. Bioaccumulative potential

No bioaccumulation potential.

#### 12.4. Mobility in soil

Easily absorbed into the soil.

### 12.5. Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage  $\geq$  than 0,1%.

Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023 Page n. 7 / 9

### SECTION 12. Ecological information ... / >>

### 12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

### 12.7. Other adverse effects

Negligible ecotoxicity.

# SECTION 13. Disposal considerations

### 13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

### **SECTION 14. Transport information**

The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

### 14.1. UN number or ID number

not applicable

### 14.2. UN proper shipping name

not applicable

### 14.3. Transport hazard class(es)

not applicable

### 14.4. Packing group

not applicable

### 14.5. Environmental hazards

not applicable

### 14.6. Special precautions for user

not applicable

### 14.7. Maritime transport in bulk according to IMO instruments

Information not relevant

# **SECTION 15. Regulatory information**

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category - Directive 2012/18/EU:

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006
Product
Point 3

None

Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors not applicable

### Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage  $\geq$  than 0,1%.

Revision nr.1 Dated 29/11/2023 First compilation Printed on 29/11/2023 Page n. 8 / 9

### SECTION 15. Regulatory information ... / >>

Substances subject to authorisation (Annex XIV REACH) None

Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012: None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention: None

### Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

### 15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

# **SECTION 16. Other information**

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Eye Irrit. 2	Eye irritation, category 2
Skin Irrit. 2	Skin irritation, category 2
STOT SE 3	Specific target organ toxicity - single exposure, category 3
Skin Sens. 1	Skin sensitization, category 1
Aquatic Chronic 3	Hazardous to the aquatic environment, chronic toxicity, category 3
H319	Causes serious eye irritation.
H315	Causes skin irritation.
H335	May cause respiratory irritation.
H317	May cause an allergic skin reaction.
H317	May cause an allergic skin reaction.
H412	Harmful to aquatic life with long lasting effects.

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses. Provide appointed staff with adequate training on how to use chemical products.

### CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
